

SHRIRAM PISTONS & RINGS LIMITED: NEW DELHI

Environment Protection Policy

1. Preamble:

At Shriram Pistons & Rings Limited (SPRL), we are dedicated to minimizing environmental impact and fostering a sustainable future. Environment Protection Policy reflects the commitment to reducing carbon emissions, conserving resources, and adopting sustainable practices across all operations while promoting societal and environmental betterment.

2. Mission:

We strive to be a responsible corporate citizen by embedding sustainability into every aspect of our operations, fostering a cleaner, greener future, and creating value for people, the planet, and profit.

3. Scope:

This policy applies to all employees, contractors, suppliers, and stakeholders involved in activities impacting environmental resources on behalf of SPRL. It encompasses all aspects of environmental management, including planning, utilization, conservation, and operational practices across all facilities under the Company's control.

4. Commitments:

- a. Commitment to Responsibility:** We prioritize reducing our ecological footprint through ethical and environmentally sound practices, regularly improving our environmental management systems to uphold high standards.
- b. Commitment to Society:** We are committed to fostering sustainable growth and inclusive development by addressing societal challenges, engaging with communities, and implementing responsible business practices that create shared value.
- c. Commitment to Environment:** Our commitment to the environment encompasses several key areas of focus:
 - Minimize carbon emissions via energy efficiency and renewable energy adoption.
 - Conserve water resources by implementing recycling and efficient usage practices.
 - Use sustainable packaging and responsibly sourced raw materials.
 - Promote biodiversity through habitat restoration and conservation efforts.

- Reduce waste generation and prevent pollution with proactive risk management measures.
- Adapt to climate change impacts by integrating environmental risks into SPRL's risk management and internal control systems.
- Build infrastructure resilience to withstand extreme weather events and changing environmental conditions.
- Conduct risk assessments to proactively address potential vulnerabilities related to climate change.
- Implement emergency preparedness plans to ensure employee safety and operational continuity during environmental crises.

5. Compliance and Responsibility:

We are committed to adhering to all applicable environmental laws, regulations, and industry standards. Our proactive approach includes regular audits, staying updated on regulatory changes, and fostering a culture of compliance through employee training and stakeholder engagement.

6. Guiding Principles: Our Environment Policy is guided by the following principles:

a. Carbon footprint management - We recognize the urgent need to reduce our carbon footprint and are committed to achieving this through:

- Transition to renewable energy sources across operations.
- Optimize energy efficiency and adopt clean technologies.
- Collaborate with suppliers to reduce emissions along the value chain.
- Monitor and report progress.

b. Water management - At SRPL, alongside our partners, we aim to enhance water sustainability through:

- Enhance water efficiency with a focus on high-stress locations.
- Implement water recycling and treatment technologies.
- Support local water conservation initiatives.

c. Renewable energy - We recognize the vital role of renewable energy and are committed to:

- Conserving energy and natural resources by adopting operational practices that promote renewable energy usage.
- Regularly assessing our energy consumption to identify opportunities for improvement and innovation.

d. Sustainable packaging and Raw Materials - We strive to minimize environmental impact via:

- Promote recyclable and eco-friendly packaging by reducing plastic content and utilizing recycled materials.
- Encourage vendor and partner collaboration to adopt sustainable packaging solutions and less harmful alternatives.
- Provide training on environmentally friendly production practices and capacity building for sustainability.

e. Air Pollution Management - We understand the importance of air quality and are dedicated to mitigating air pollution through:

- Utilizing clean and energy-efficient technologies to reduce harmful air emissions.
- Partnering with suppliers and stakeholders to implement air quality improvement measures across the supply chain.
- Conducting regular air quality monitoring to establish ambitious goals for continuous improvement.

f. Biodiversity - We value biodiversity and aim to protect and enhance it through:

- Partnering with environmental organizations to protect biodiversity and safeguard local species.

g. Waste Management and Recycling - We are committed to efficient waste management and recycling, focusing on:

- Reducing waste generation through responsible procurement and sustainable production practices.
- Collaborating with waste management partners to ensure the environmentally responsible disposal of waste.

h. Prevention of Local Pollution - To mitigate local pollution, we will:

- Implement strict controls and best practices to prevent the release of harmful pollutants into the environment.
- Conduct regular environmental risk assessments to identify and address potential pollution sources proactively.

i. Environmental-Friendly Service and Support - We strive to provide environmentally friendly services and support by:

- Encouraging clients to adopt sustainable practices to reduce their own environmental impact.

- Continuously improving our services to align with evolving environmental standards.

j. Life Cycle Assessment - We recognize the significance of life cycle assessments and will:

- Conduct thorough evaluations of our products and processes to assess their environmental impacts at every stage of their life cycle.
- Collaborate with stakeholders to enhance the overall environmental performance of our products and services throughout their life cycle.

7. Review and Revision This policy will be reviewed annually or as required to incorporate advancements in sustainability and align with global environmental standards.

Approving Authority:
